

zzTakeoff for Education

Empowering the next generation of construction professionals.

zzTakeoff is proud to support colleges, universities, and technical institutions by providing access to our cutting-edge cloud-based takeoff software for educational use. Our academic program is designed to prepare students with the tools and workflows used by top professionals in the construction and estimating industries - bridging the gap between classroom learning and real-world application.

What is zzTakeoff?

zzTakeoff is the easiest online takeoff platform for construction. Designed for real-time multi-user collaboration, it allows teams to upload plans, perform detailed measurements, and generate quantity takeoffs all in the cloud. With AI-powered features like automatic page scaling, renaming, and takeoff grouping, zzTakeoff eliminates tedious setup work so users can focus on accuracy and speed.

Students and educators will experience:

-  Real-world takeoff workflows
 -  Multi-user collaboration for team assignments
 -  AI tools that streamline estimating tasks
 -  Browser-based access—no downloads or installs
 -  Time-saving tools used by professionals across the World
-

Academic Program Benefits

Our goal is to help instructors prepare students for modern roles in construction management, estimating, and digital project coordination.

With zzTakeoff's Academic Program, your institution gets:

- Educational licenses for classroom or lab use
- Access for instructors and students via individual or shared accounts
- Curriculum support and onboarding resources
- Real-time collaboration tools perfect for group projects
- Ongoing software updates - always the latest version, automatically
- Academic support from the zzTakeoff team

Who's it for?

- Construction Management programs
 - Architectural Technology & Design programs
 - Civil Engineering departments
 - Trade schools and apprenticeship programs
 - High schools with construction career pathways
-

How Institutions Use zzTakeoff

- Teaching quantity takeoff and digital estimating
 - Running collaborative group assignments
 - Preparing students for real-world project workflows
 - Integrating cloud-based construction technology into the classroom
-

How to Get Started

Getting zzTakeoff into your classroom is easy. Here's how:

1. Apply for academic access using the form below
 2. Receive licenses for educators and students
 3. Schedule an onboarding session with our team
 4. Start using zzTakeoff in your curriculum
-

Contact Us

Have questions or want a demo?

Our team would love to talk to you about how zzTakeoff can support your program.
